Features AutoCAD is a high-end, professional, desktop, 2D CAD software application. It supports both vector and raster graphics, and offers many 2D drafting capabilities, including drafting, mechanical, electrical, civil, architectural, mechanical, and architectural engineering. Add-ons The AutoCAD command-line interface (CLI) can be customized through the use of add-ons. For modeling, AutoCAD has many add-ons, such as "AutoCAD Python Scripting Toolkit," "BMAKER," "FEMA Software," "FEMA Modeling Toolkit," and "FEMA® Web App Builder." History and versions The following is a timeline of major AutoCAD versions. 1979 Autodesk files a patent for the invention of the raster graphics system, which would allow AutoCAD to import and edit DXF files. Major Architectural Software Programs CADCore is a commercial architectural software application with the company license of Autodesk, originally developed by The James and John Alexander Company, later called Architecture Development Corporation (ADC), and which was owned by GE until 1992. In 2002, Autodesk acquired a full ownership of ADC. ADC's portfolio includes the following: AutoCAD, a commercial 2D drafting program for architects and mechanical drafters AutoCAD Architecture, a free and open-source architectural CAD program for architecture students ArchitectureWorks, a commercial architectural design application for mechanical drafters D-Cubed Architect, an architectural drafting program. AutoCAD Civil, a 3D modeling and detailing application for the design of buildings and civil engineering projects AutoCAD Electrical, a 3D modeling and detailing application for the design of electrical engineering projects AutoCAD MEP, a software application to design mechanical, electrical, plumbing and fire protection systems Other 3D Architectural CAD Programs AEC One is a 3D Architectural CAD program produced by AECom Technology. It is available for Windows, Mac, and Linux operating systems. AutoCAD MEP (short for Mechanical, Electrical and Plumbing) is a 3D architectural engineering software program based on the same technology as AEC One. BIM 360 Architect is a powerful BIM 360 solutions platform for architects, project managers, builders, engineers and owners. It is developed and supported by the company Matrix BIM360 with the purpose of promoting 3D BIM in the built environment, solving a 3D BIM workflow, removing the barriers to BIM in industry, and reducing time, labor and cost for the design of any building project. DesignJet is a well known CAD application that is used to create 2D and 3D drawings. It is developed by the National Centre for 3D Printing in Australia. Draftsight is a powerful design environment tool to create and render 3D objects for architecture, engineering, and construction. MacCAD is a design program created by Macromedia for the Macintosh platform. It was based on The NAG 2D Software Architecture. Autodesk bought Macromedia in 2006 and shut down Autodesk NAG2D. MacCAD was then completely rewritten as Autodesk AutoCAD. AutoCAD 2011 introduced a Windows port 5b5f913d15
