## CompanionLink For Google

Do you have multiple accounts on different devices? Do you want to get quick and easy access to the information saved on each account? The application allows users to access their Gmail, Calendar, Drive and Google+ accounts quickly, easily and securely. The application does not try to force information into Gmail by converting the accounts; it tries to mirror the account but that is all. User accounts can be added to the application, but that is not necessary to use it. Many users are able to access the information without using Google accounts. CompanionLink Features: • Mirror of user accounts on multiple devices • Email in Google applications • Calendar in Google applications • Contacts from Google • Google+ in Google applications Benefits of CompanionLink: • Access all your Google accounts from one central location • Write and manage information on Google Documents • Add custom labels to information • Add custom rules to organization • Complete information management • Export all data • Manage multiple users • Searching specific information • Sync information from multiple Google applications • Visual customization and personalization of information Advanced ToolTip: • Advanced tooltips will help to explain more in-depth information to the user when needed. Usability: • User accounts can be added to the application, but that is not required to use it. • Most users are able to use Google accounts without using the application. • The information displayed on your device (desktop, tablet, smartphone) is the exact information you have selected for all Google accounts. • Your information and the information of your contact accounts, are synchronized between all connected devices. • There is a synchronization in information between all applications. Limitations: • The time and date of synchronization cannot be customized. • There is no information on how to update and delete your information. • In the first installation, the application does not automatically sync your Google accounts. • Information from the Google Accounts are the data that is currently visible to you. • The information only appears on the device or application you have selected for the account to be connected. • The synchronization does not occur between all Google applications. • You cannot export the data to your PC or your mobile device. • There is no confirmation of the information that will be synchronized. • The application does not allow remote access to the user account. Terms of Use • This application is for FREE, but you may use it only for personal and private

## What's New in the?

CompanionLink for Google, or more simply CompanionLink, is a Google account manager that can connect to several major web services, including Gmail, Google Calendar, Google Contacts, and even allow users to use Google Drive to sync information. Syncing information across devices via Google Drive can be very useful, especially for users with multiple machines. If you need to keep information available on multiple devices, this is a useful application to download. CompanionLink for Google has some very useful tools. It is possible to sync information between different devices such as an Android phone, a Windows PC, and even a Mac if you want. It also has an option to control how much information can be synchronized. CompanionLink for Google is also a robust application. It contains some great features, including options to add Event and Location information, and it also offers a searchable Notes feature so you can find lost or important pieces of information. Additionally, you can set up a separate Google account to sync with your email and other Google services, and it can even sync information across different browsers. CompanionLink for Google can handle all of your Google account needs, with a nice and clean interface, convenient and easy to use options, and even many useful features. CompanionLink for Google Features: Syncing with Google Drive Works with all devices and not just Google accounts Many useful and convenient features Easy to use If you are looking for a premium PC monitor, you are in the right place. Here you'll find the best and cheapest PC monitors that you can currently get your hands on. I've tried to make sure this is a current list with monitors that are still being sold. However, don't expect every computer monitor to be here! What do you look for in a PC monitor? Here are some of the things we've looked for... - Maximum display brightness. This is the most important part of a monitor. If it's too bright, you will have to adjust your computer's brightness settings all the time. If it's too dark, you'll have trouble finding what you're looking for and may have to use your computer's keyboard to adjust brightness manually. - PPI (pixels per inch). This is how many pixels the monitor is capable of displaying, and how much space it is able to fill on the screen. This can be measured in thousands of PPI. A commonly used value for PPI is 300. PPI is the main factor in determining the overall clarity of an image on a
