This website is a way to help you build your website completely free of charge. You just have to choose the topics you want to appear on your site, and the amount of each topic, and that is it. When you're done, click on "Go" and your site is ready! And since we know how annoying it can be to copy and paste code into the section of your website, we have created this tool which allows you to add any/all of our topics at once. And you can also add our "Protected" topics for free, which you can use for your Privacy Policy. The topics are pulled from our database of about 16,000,000 topics, and have been reviewed by our editors. To see our topics, click "Show Topics" in the menu at the top of this page, or simply search here: Google Docs Clipper allows you to take documents from Google Docs into other Microsoft Office applications. Create a new Yahoo! user account in a few minutes. Import username, password, domain, first and last name, birthday, gender and other info from Excel file. Save single and multiple (Proxy Server) accounts. Free trial. MASS Easy Facebook Login: If you are having trouble getting verified with Facebook, MASS Easy Facebook Login is your solution. The software works at the application level, and what it does is automatically makes a request to Facebook whenever you need to login. This will happen even if you are logged in to your Facebook account in the background, because MASS continues to do its job and continue to log you in to your FB account and verify your email. While you cannot manually log into Facebook from MASS, it's not difficult to get it to work for you. Just follow the instructions in the very first section of the application. MASS Google Plus Login: If you have been using Google Plus (or G+), you probably already know that the application keeps logging you in from the same IP address every time you go to the site. The problem is that Facebook is doing this as well, which means that now, you are seeing the same faces every time you visit the site. MASS Google Plus Login can fix this problem, and you won't even have to lift a finger. To try it out, click on the 'Next' button inside the Google Plus login tab. What you will need to do now is to make sure that you use the correct Google Plus data which is separated in the following sections. First, if you are using Gmail on your Google Plus profile, paste your mail address in the fields next to Email and Password. Next, if you are using a non-Gmail email service on your Google Plus profile, you will need to enter the email address as well as password that is associated with that service. When you have finished that, click on the 'Next' button and that will be it. MASS Google Plus Login has been created so that people will be able to login to Google Plus without the hassle of using credentials. MASS Yahoo Email Address Creator: If you have been surfing the net, then you will have noticed that there is a problem with Yahoo. Now, if you try to create a Yahoo account, you will get a popup that says, "
