The PPT ML course provides an opportunity for both academic and industrial designers who are looking for a way to learn this modern, efficient and productive design. This course has a practical focus and allows you to work out step by step the procedure for formal validation and audit any work, regardless

of their purpose, including such as WYSIWYG sites and web design. PPTP (Unix Networking Portable Text Publishing System) is a solution that allows students to use theoretical programming skills to create websites and also as a solution for publishing stories online. It is a flexible and at the same time affordable solution that provides efficient work in network projects. The software package allows you to create high-performance systems that are easy to implement on any hosting server or application server. The CAdisco TypeScript API is a class and script library that provides access to the use of the CAdvisor engine in various JavaScript scripts that use the Type System. This is the only solution to date

that can be used to generate JavaScript code and Java scripts. The program allows students to learn the basics of the Basque language and choose the subjects that will be taught throughout the semester. Also, the PO Edu project prepared a Business Game to help students prepare for the entrance exams. The Motion Control Model is a platform for professional independent research and education and collaborative product design. It includes all the parts necessary for the qualitative organization of interaction between various authorities and industries, such as: business, engineering, science, society and the state. Modeling allows workgroups, students, their instructors and consultants to create more flexible, efficient and task-

oriented products. The Computer Animation Fundamentals Tutorial is a video course on creating characters using various types of tools. The course offers:

- consecutive analysis of animation up to master's levels; detailed study of the basic principles of character creation;
- learning how to visualize, layout and storyboard;
- different approaches to block layout and drawing shapes;

Acquisition of character visualization skills and creation of working projects. It will be especially useful for those who wish to learn how to create 3D prototypes and marketing presentations. During the course, the elements of the architecture of a computer animation studio, interaction on the stage and the basic principles of

building
