VeryPDF Barcode Recognition SDK Crack Free

VeryPDF Barcode Recognition SDK is a development library that is capable of identifying 1D and 2D barcodes in digital images, PDF files or scanned documents. Once implemented, the provided components enable you to integrate barcode recognition functionality into your software. The employed algorithm is designed to recognize barcodes regardless of the position or orientation of your images, and multiple file formats are supported: PNG, BMP, PNG, JPG and TIF, as well as multipage TIF and PDF. VeryPDF Barcode Recognition SDK offers support for a broad range of platforms and programming languages, such as .NET/WPF, Java, C/C++, Objective-C, PHP, Javascript, VBScript, Delphi and ASP. The included software is capable of recognizing a wide array of 1D barcode formats, including Code 39, Codabar, Code 128, EAN 13 and UPC, as well as 2D formats like PDF417, DataMatrix, Aztec and QR-Code. Furthermore, postal barcodes such as Planet, PostNet, Australian Post and Royal Post are also supported. VeryPDF Barcode Recognition SDK can read both color and bitonal images, and it is designed to adapt to damaged or poor quality barcodes automatically. Error-correcting codes provide increased accuracy in these cases, and multiple barcodes can be identified and decoded from each processed page. The available libraries are intended to be as simple to integrate as possible, as only a few lines of code should be required. They are all written in C++, and are built with efficiency in mind. To help developers implement the components, local documentation is provided, explaining both the SDK's capabilities and offering useful examples. Version 2.0: * Supports an extended range of barcode formats. * Improved batch processing with the ability to recognize multiple barcodes from each image * Supports up to 65535x65535 images Version 1.1: * Supports both color and bitonal (black and white) images * Support of images with animated GIF format * Support of flexible formats which are widely used in industry and office * Improved UTF-8 encoding and decoding * Improved support of mixed-encoding images * Higher error-correcting ability * Support PostNet format * Support of images with damaged barcode Version 1.0: * Initial release * Supports only one barcode format * Supports only limited version of images
