The function is to tell you how many bytes are left on your CD-Rom. It only functions on CD-Roms using the 8x speed. The information of the length of the file will show you in bytes. If your CD-Rom works with 8x or 16x speed you can set the speed in the Wizard to 16x in case of CD-Roms using the 16x speed, and set the speed to 8x in case of CD-Roms using the 8x speed. You can activate the "Pending Jobs" Wizard with one of these commands. If you use the following command the CD-Rom will not open automatically and will be opened after the completion of the command. x:\cdrom\cdrom0*.vob *.svi *.tsv If you use the following command the CD-Rom will open automatically and will close after the completion of the command. The VideoToWin program is used to convert.vob files in DVD format to Windows Media format. VideoToWin is an very powerful program that allows you to change the resolution of the video. In case you don't need a standard screen resolution use the Resolution option to change the size of the video to fit into a smaller screen size. If you want to open a wav file that is not supported by VideoToWin, you can do this with VLC Media Player. NOTE: The resolution of the output file has to be changed if you want to see the entire information that is contained in the video file in the output file.
