## Merge Soft Calculator For PC (2022)

Simple and easy-to-use calculator, containing basic math functions. Can be used as a standalone application or for mathematical assistance in educational software. Merge Soft Calculator is a small software application designed specifically

---

for helping you perform basic math calculations on the breeze, such as addition, subtraction, multiplication, division, and trigonometric functions as well. User interface The word that describes best the layout is simplicity. Everything is kept as basic as possible, so there's support for only a few dedicated parameters that you can play with. How it works Merge Soft Calculator gives you the possibility to enter the numbers with the aid of your mouse, so you cannot rely on the keyboard input. What's more, the result can be copied to the clipboard, so you can easily paste it into other third-party utilities. The tool also offers support for trigonometric functions like sine, cosine, and tangent, and lets you easily switch between degrees or radians. On the downside, it doesn't keep a history with all your calculations, which can be exported to a file. Performance Since there aren't any configuration settings, even less experienced users can learn to master the entire process with minimum effort. During our testing we have noticed that Merge Soft Calculator carries out a task very quickly and without errors throughout the entire process. It leaves a minimal footprint on system resources, so it doesn't hamper computer performance, nor interfere with other programs' functionality. Bottom line To sum things up, Merge Soft Calculator seems to be the right choice for users who are looking for an easy-to-use calculator that comes bundled with limited features. Its intuitive layout makes it an ideal tool for children or students who need extra help with their homework.

Its intuitive layout makes it an ideal tool for children or students who need extra help with their homework.

A few days ago we told you about the Blue Pig -- the "more pirate-y" version of the Apple TV, the one without a remote and with the power of the iPhone. Now it's out, and it

---

does look very cool. The new Aereo model has the same silver exterior as its big brother, but features a large, domed rear housing a couple of antennas. It also has a modified black Apple logo and a thin profile that should allow for a better hold in your hand. The Aereo console looks a bit like an old-fashioned radio. Not that its design is a rip-off -- it's just been upgraded with all the hardware required to take advantage of Apple's new wireless chip, the A6. So it supports AirPlay, AirTunes, and iTunes Wi-Fi syncing. It's also got an on-screen media keyboard that takes advantage of the rear keypad to offer a slicker UI. As with the first model, there's a \$39.99 monthly fee for the service. The new model will be available in stores this fall. All we need now is some custom RAM with Tintin on it and we'll be living in a
