
Ping For Life Crack + [Latest] 2022

Ping for life is a network monitoring application whose purpose is to help you ping host names or IP addresses and check the connection status. You can use it for performing trace routing tasks and keeping your Internet connection alive. Portable tool You can run the utility on your system by simply opening the executable file, as you don't have to go through an installation process. You may store it on USB flash drives and other portable devices. Clean feature lineup The design looks straightforward and all the program's settings can be reached with minimal effort. You can build up a list with the host names or IP addresses that you want to ping. It is important to mention that the app is able to ping multiple hosts at the same time. Pinging options Ping for life gives you the possibility to select the entries from the list that you want to ping, and start, pause or stop the process. The program reveals information about each pinged IP host name or IP address, namely status, sent packets, success and failure rate, elapsed time, date and time when the action is initialized, minimum, maximum and average time, as well as date/time when the ping last responded. The tool embeds a log panel at the bottom of the main window for helping you gather details about the date and time, host or IP address, status, number of bytes, trip time (in milliseconds), and hop limit. Plus, you can clear the log with a single click, automatically scroll the information displayed in the log, and copy data to the clipboard. Ping for life saves your current ping session in case you want to close it. Configuration settings and alerts You can specify the time between pings, ping timeout, hop limit, and buffer size. What's more, you can set up alerts that can be triggered in case the app records a custom number of consecutive lost packets. Ping for life is able to show popup notifications, display system tray icon alerts, play custom audio files (WAV file format), log data in the Windows event log, and send emails. Bottom line All things considered, Ping for life comes with useful features for network administrators. It's intuitive and can be mastered by beginners and professionals alike. Edit By Rory Johnson; Editing by John Pick NetGuard is a network monitoring application that allows you to monitor the network traffic in real time. It is capable of storing the files that you upload to the Internet, as well as

What's New in the Ping For Life?

- Short for "ping of life," this program is a tool for monitoring active Internet connections.
- You can use it to verify the connection state of a host or IP address.
- The utility can be run directly from your desktop, providing you with a hassle-free way to perform your Internet connectivity tests.
- You can create a list of hosts or IP addresses to be pinged, and monitor the connection.
- You can select individual entries in the list, start, pause or stop the process of ping.
- If the host or IP address that you want to ping replies, the app shows information about it, including the status, time of last response, and elapsed time since you started the process.
- Ping for life allows you to monitor a complete ping session, including the time, date and time when the ping started, minimum, maximum and average time, and date and time when the ping last responded.
- The utility gives you the possibility to clear the log, automatically scroll the information displayed in the log, and copy the data to the clipboard.
- Ping for life saves the current ping session in case you want to close it.
- This tool embeds a log panel for monitoring the complete date and time, host or IP address, status, number of bytes, trip time (in milliseconds), and hop limit.
- Ping for life can provide you with any information that is shown when you start, stop, pause or resume the process of ping.
- There are no in-app purchases and you don't have to download any files.
- The app installs the Windows Service for automatically starting the process whenever the system reboots.
- The tool is equipped with clean and intuitive user interface, making it easy to get started and use.
- You can choose between two types of sound alerts, play a custom audio file (WAV file format), log data in the Windows event log, and send emails.
