Jeppesen FLightStar is an excellent application that comes with many . I have Flitestar 8.5 but to be honest it's pretty free. It's fairly light weight and I found it loaded my tablet fairly quickly - it only takes up about 15MB of memory. This is one of the best options between apps that I have found. Of course, you can find thousands of other free apps, but there are some drawbacks: the app does not contain anything that can be done especially for you. It also has a 600MB download limit, so if you want something more than that, this is not an option.
