Snippets Manager includes a code editor with a variety of plugins that will allow you to create and manage your snippets easily and comfortably. A list of available snippets can be found in the right sidebar. Here, you can even define your own snippet and add a note for it. By using the search feature, you can find a snippet quickly and easily. You can set the snippet's kind (full code, snippet, function, class, JavaScript, design, Regex, fun) and then the snippet's title. Clicking on the settings button will enable you to define the snippet's expiry date, allowing you to have access to old code snippets without worrying about the date of the next version. By pressing the 'Insert snippet' button, a code block can be inserted into any website, allowing you to quickly reuse it later on. To do so, simply place the code in the provided box and then click on the insertion button. If you want to quickly insert the snippet to a document, you can use the clipboard by pressing the clipboard icon. The Snippets Manager has a handy settings panel where you can change the snippet's visibility to 'public' or 'private'. If you want to change the snippet's visibility, you can press the 'Set visibility to public' button. This is the Snippets Manager's security feature that allows you to hide snippets for a limited time. Snippets Manager Note: Snippets Manager is a web-based application and should be accessed using
