
KeyMacro is a simple and easy-to-use macro recorder for your keyboard. Record, edit, analyze and repeat macros with just one simple step. KeyMacro is very easy to use. Just click the "Record" button to start recording a macro. "Edit" button to edit the existing macro. Click the "Loop" button to repeat the recorded macro. In a short time, you can create complex and repeated keys. It is quite useful when you need to repeatedly perform the same key. With KeyMacro, you can edit all macros easily and quickly. Use the "Find" option to quickly find a specific macro. And use the "Find/Replace" function to perform global search and replace. New features: 1. Record one single key and repeat it when you need. 2. Support all common keyboard shortcuts. 3. Quickly find a specific macro to quickly edit it. 4. Support for many different keyboard layouts. 5. Support for all popular languages (such as English, French, Spanish, German, Russian,...). KeyMacro has many other features as well, including: 1. Export keymacros to xml or html file. 2. Edit keymacros in a simple manner. 3. Support for both keyboard layout and keyboard language (Microsoft Windows 10 64 bit). KeyMacro is an easy to use macro recorder with many useful functions. You can download it from: KeyMacroDescription: KeyMacro is a simple and easy-to-use macro recorder for your keyboard. Record, edit, analyze and repeat macros with just one simple step. 1. Simple and intuitive. 2. Extensible to process any number of files. 3. Optional to record a message if you want. 4. Encryption algorithms and modes: AES, 3DES, RC4, Serpent. 5. Use of file text if not encrypted. 6. Functions for generating and saving a key file. 7. High performance and low cost. 8. Cross platform: Windows, Linux, Mac. * Record a message: No one will know the encrypted content except you. The original key is deleted and will never be used again after the encrypted text is decrypted. If you need the original key again, you must create it again. * Auto-populate the message box with the encrypted text after decrypting. * AES with the default mode of ECB encryption. Encrypted Notes Features: 1. Simple and intuitive. 2. Extract any file in encrypted mode by drag and drop the TXT file to Encrypted Notes. 3. It can process all text files and save them as a new file in another directory. 4. Support to encrypt files and create keys. 5. Support to add a message into the encrypted file to record your thoughts. 6. Use a keyboard to choose a strong password and encrypt a file. 7. Using a Message box to record a message. 8. Can be used as a desktop application to encrypt files. 9. PGP, PGP, PKZIP and 7-Zip are supported as formats for saving the encrypted file. 10. You can set the file extension to EXE, DLL, ZIP, etc. 11. It can set the encryption algorithm and encryption mode (ECB, CBC, CTR, RC4, CMAC) to meet your specific needs. 12. You can set the length of the password to encrypt the text. 13. Encrypted Notes can handle any number of TXT files. 14. Use cross platform. 15. You can see the encryption result by executing the EXE file, and use the original key to decrypt it. 16. When you encrypt a file, you will see a message saying if the encryption is successful. 17. You can save the key file by encrypting your text files in Encrypted Notes and adding it to your choice. 18. Support to save to a key file. 19. You can use your favorite encoding to edit the text. 20. You
