
----- This macro applies a Crop like effect. - Select the frame - Choose the scissors tool - Click to select the cut out area - Remove selected area from the frame - Then click somewhere outside the frame - Click on the "X" to exit As a quick tip, you can save lots of time by using your mouse or other pointing device to select multiple frames. Select one, then hold the Shift key to add all the frames that are selected. You can also copy/paste frames using the keyboard. First, select the frames you want to copy. Then press the "Ctrl" and "V" keys at the same time, and the frame will be pasted. If you hold the shift key, the frames will be pasted on top of one another. Or you can simply press "Ctrl" to copy one frame and "V" to paste the frame. If you are copy/pasting a lot of frames, you can also use the shortcut "Shift+Ctrl+V" to paste all the frames on the same sheet. "Mute tool" takes your hard work and saves you hours of time. Why waste time using Photoshop for cutting your frames? QuickKut is the best and most efficient solution that you can find. If you are interested, please check the tutorial video. KEYMACRO Description: ----- This macro removes some excess space around a frame. - Select the frame - Choose the scissors tool - Click to select the excess space - Remove selected space - Then click somewhere outside the frame - Click on the "X" to exit Here is a video tutorial for quickcutter. KEYMACRO allows users to easily use a Mac Keyboard shortcut that is not available in the default system menu. In order to set any keyboard shortcut, users need to select a predefined keyboard combo and assign the shortcut to it. Once a shortcut has been assigned, it can be used to control the Mac applications without a need to use a mouse. Moreover, by default, the shortcuts can be activated directly from the system menu. Start Keymacro Today, Download Now! Th2vols Description: Th2vols is a free tool that enables Mac users to get complete control over the Apple Macintosh through a keyboard. This free utility was created to allow users to take advantage of the powerful keyboard shortcuts found in many Mac applications. Thus, the main advantage of this app is that it can be used to activate applications without the need for a mouse. Moreover, the tool provides a list of the available keyboard shortcuts, enabling users to assign them to any button on the keyboard and creating easy-to-remember macros. As a result, users can control many different Mac applications with a single keypress. Moreover, if users want to change the shortcut settings, they can do it directly from the application, without needing to open the Keyboard prefpane. This tool provides a very intuitive interface, allowing Mac users to perform all actions without hassle. It also comes with a variety of options, including a GUI or command-line mode, an on-screen keyboard, and settings for many languages. Supported Languages The app can be used in any language. For that, users need to select the language from a list of available options. Th2vols Features: * Keyboard Shortcuts * GUI or Command-Line Mode * On-Screen Keyboard * Multi-Language Support * System Preferences * Settings for many languages * Customizable * Send feedback * Customer Support Th2vols 4.0 is a free tool that allows Mac users to get complete control over the Apple Macintosh through a keyboard.
