Detects numerous radio stations Once you access the main window, you can simply specify the genre you are interested in and explore the available stations. Alternatively, you can look for radio channels that are streamed in certain regions and countries. For each record, you can view a wide range of information, such as full station name, genre, country, type, bitrate and an optional brief comment. You can add custom stations If you are not fully pleased with the radio stations provided by RarmaRadio, you can just add your own custom data and connect to a new station. Supports recording tracks Another useful feature of RarmaRadio is that you can record whatever track impresses you. The app supports several encoders and you can select the one that best suits your

necessities: MP3, OGG, AAC, WMA or FLAC. You can set up a filename pattern so that every time a song is recorded it automatically saves information like artist and track name (if this data is not available, only the recording date is stored).
